Recommendation for Donald Blajda

We found Don through a search of Home Advisor for an architect who could provide us with a set of professional construction drawings for our new home which we had designed ourselves and drawn in pencil on graph paper. Don was an immediate help. He pointed out any design flaws we had made and offered to adjust our basic plan to make it more architecturally pleasing from the outside as well as more livable on the inside. He was agreeable to keeping our design as the basis for any changes. We went through several variations in the floor plan dealing with the size of the rooms while keeping their locations the same. He was always polite in his suggestions and listened to any objections we had about one thing or another until we had just what we wanted. As expected, he was knowledgeable about building codes, the sizing and strength of structural components, window sizes, woodstove placement, etc. and these were clearly shown on the drawings and instructions for the builder.

We are very pleased with the set of drawings Don produced. The changes in each preliminary plan were made in a timely fashion. He always treated our original plan as good with a few novice mistakes, and was determined to give us the home we had envisioned. We recommend his work enthusiastically.
